JavaFx registration system

by Tursunbekova Eliza&&Samara Beknazarova
group Com20
lectorer Isaev Ruslan

Steps of creating:

1. Project selection.
2. Beginning of codding(creating database schema, table with needed columns, connecting IDE with MySQL, creating visual design in SceneBuilder and then codding)

3. Finishing the project.
4. Test of the app.
5. Githab repository creating.
6. Adding README.md (discription, photos)
7. Presentation
8. Youtube video creating

- **The app - "AIU Students Community"**
- **Programming language Java**
- **IDE - IntelliJ IDEA**
- **Visual layout tool - SceneBuilder**
- **Database Management System - MySQL**
